

## Smart, Optimal, Dependable Charging

### Move More with Deka PowerForce.

Introducing a unique and exclusive fully-integrated charging system designed specifically for all Deka motive power batteries — lead and lithium. The Deka PowerForce is the premier, cutting-edge charger for all Lift Truck batteries — regardless of the manufacturer.

- **Smart Technology** – With a highly energy efficient charger featuring a large, customizable intuitive color touchscreen control panel, managing your fleet's motive power needs has never been easier.
- **Optimal Functionality** – Engineered to meet the 24/7 needs of today's material handling fleets, the Deka PowerForce offers a highly efficient modular space-saving design, providing more runtime for your fleet.
- **Deka Dependability** – Keep your fleet moving and eliminate downtime worries with Deka's industry leading safety, reliability, and dependability.

### Modular

Customize the charging system for your application.

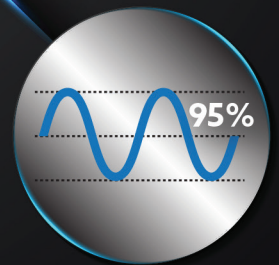

### Intuitive

Color touchscreen provides easy access to programming, diagnostics, and statistics.

### 95% Energy Efficient

Charge in all charging regimens, including fast, opportunity, and conventional.

### More Runtime

When one module is out of service, the others keep working.

### Flexible

Recharge any lead battery, flooded or sealed — also recharge lithium batteries.

### Real-time Insights

Monitor and control remotely with real-time access to data.

## SMART TECHNOLOGY

### 95% Energy Efficient

The Deka PowerForce charging system is highly energy efficient at 95% (CEC Compliant). It is built to perform in all charging regimens, including fast, opportunity, and conventional. Advanced AC and DC power protection ensures safe, reliable performance with a high degree of protection against voltage and current transients.

### Effortless Touchscreen Control

An integrated color touchscreen interface provides intuitive control with easy access to programming, diagnostics, and statistics. The dashboard background colors indicate the health of the charge cycle and charger, enabling users to quickly assess system status.

### Powerful Insights. Anytime. Anywhere.

Fully networked and cloud ready, Deka PowerForce can be monitored and controlled remotely using our fleet management tool. With access to real-time, actionable data, users can easily manage their battery and charger fleets to lower operating costs, improve battery life and increase performance and productivity.

## OPTIMAL FUNCTIONALITY

### Modular Configuration

Our unique modular design makes it possible to customize the charging system for your application. Each case fits up to four modules delivering a maximum 300A output, or two cases can be stacked to combine eight modules for up to 600A.

### Space-Saving Design

At only 14 x 14 x 16 inches, Deka PowerForce packs a powerful punch in a small footprint. Mounting options include a wall mount bracket, stands, or pogo mounts for one or two units. Plus, an integrated breakaway connector improves safety and keeps the charger on the stand should an operator forget to disconnect a battery before driving away.

### More Runtime

Modular technology also means when one module is out of service, the others keep working — increasing uptime. Plus, single tool service access enables fast, easy repairs when needed. Advanced controls allow custom charger programming to meet your unique power needs.

### Flexible Compatibility

The Deka PowerForce charging system is designed for optimal use with all Deka brand motive power batteries. Even better, the charging system can recharge any lead battery, flooded or sealed (Gel/AGM), and can also be set to recharge lithium batteries.

## DEKA DEPENDABILITY

### Proven Reliability and Safety

Designed to perform in the most rigorous conditions, Deka PowerForce leads the charge in rugged reliability. When tested in conditions ranging from high dust to high humidity and extreme cold environments, Deka PowerForce performed again and again.

### Low Total Cost of Ownership

With greater efficiency, more advanced features, and an industry-leading warranty, Deka PowerForce delivers superior performance and a lower total cost of ownership than any other motive power system available today.

### Best-in-Class 5-Year Warranty

In the unlikely event your charger doesn't perform as expected, we offer a 5-year warranty on parts and labor. And, because it's backed by Deka, a single call connects you to our best-in-class service network.

## Deka Delivers. Always.

When you need to keep material moving no matter what, choose Deka PowerForce for smart, efficient, and dependable charging. Call [610-682-3263](tel:610-682-3263) or email [motivepowersales@dekabatteries.com](mailto:motivepowersales@dekabatteries.com) to learn more.
